

MWC staff helps communities to make the most of watershed management and low impact development techniques. We assist municipal boards, community organizations, and individuals by offering an array of information and technical assistance services that include:

- Water supply protection plans
- Lake and pond assessment/management plans
- Stream assessments and management programs
- Stormwater Best Management Practices (BMPs)
- Volunteer monitoring – water quality, macro invertebrates
- GIS mapping
- Municipal bylaws – stormwater, low impact design
- Open Space and Recreation Plans
- Community Development Plans
- Guidance on state and federal environmental policies
- Low impact techniques that prevent pollution
- Community surveys

MONOOSNOC BROOK RESCUE PLAN

PREPARED BY THE LEOMINSTER LAND TRUST
AND
MASSACHUSETTS WATERSHED COALITION
OCTOBER 2004

Community organizing

- Community outreach and education programs
- Grant writing assistance
